Seagrass Chalk White Console Table

No detail is overlooked in Sea grass's courtly form. Over 81" long, this trestle console table balances on four classically reeded legs with ball feet, all connected by an embellished support brace featuring a hand-carved imperial pattern. Housing four drawers, the oak case is equally stately with decorative designs along its lip and apron, furthering a dignified look reminiscent of Old World stylings. In an intriguing display of dynamism, Sea grass's prominent traditional motifs are subtly contrasted by its grass cloth covered top under a pane of tempered glass, adding a hint of modernity. Jonathan Charles' sumptuous chalk white finish and custom hardware complete Sea grass's resplendent construction.
