Sisalana White Console Table

The Sisalana White Console Table was inspired by the flourishing Agave sisalana plant, whose spiky, leathery fronds curl up from the ground just as the petite clumps of leaves on this white console table do. "My love of the Agave plant, of which hundreds of varieties flourish in the Yucatan, has inspired me for many years," says the table's designer Marjorie

Skouras. Her passion for the Yucatan Peninsula, the surroundings in which she lives and through which she translates the flora and fauna into dynamic products in her studio, shines in this wrought iron table covered in a mix of crisp gesso white and rough gesso white finishes with a mirrored top
