Memphis Table Lamp

Aimee Kurzner calls the Memphis Table Lamp her take on the Memphis Movement from the 1980s. Made of composite in black and blue finishes, the rotund curves have that quintessential mix of art deco and pop art styles that the movement brought together. Perched upon a mosaic detail atop an optic crystal base, the lamp is topped with a black drum shade. It is one of a number of lamps and accessories in this family of products inspired by the colour palette of Piet Mondrian.
