Plumeria Chandelier

When Clarence Mallari designed the Plumeria Chandelier, he was inspired by a perfume bottle by Lalique. The oversized orb chandelier has three lights and a hand-applied finish in gesso white. The pattern on the white chandelier is made of laser-cut steel that is formed in a large wooden mold to achieve the shape and depth, which involves significant engineering skills to pull off the symmetry and balance. We also offer the Plumeria as a drum chandelier.
