Chaconne Brass Chandelier

As complex as a profile gets, the Chaconne Brass Chandelier has a circumference ringed in folded metal straps. Each piece is bent seven times to achieve the shape that is then wrapped around the frame. This is a labour-intensive process that takes a tremendous amount of concentration to ensure that the interconnecting straps end up the exact same length. Brightening the overall composition is the brass finish.

Chaconne Brass Chandelier
A2 9000-1079

Dimensions
685 X 685 X 559MM HIGH

Status
NOT IN STOCK
