Cocoon Large Pendant

The Cocoon Large Pendant was inspired by a butterfly in chrysalis, but it is meant for grander-scaled duties as a light fixture. The white pendant has a wrought iron frame covered in a vanilla finish that is beautifully wrapped in Kraft paper twine in a cream finish. The skill and patience required to create such an even flow of string makes this an artisanal piece. Tis large version of the Cocoon has a white glass globe in its interior to evenly distribute the light.
