Salima Table Lamp

Made of ceramic with a white moss glazing on its wavy surface, the Salima Table Lamp is a textural phenomenon. The ivory table lamp looks as though it has been created in layers but it's one solid piece of clay that has been manipulated to look as if it has been constructed piece by piece. This is one of our products that illustrates the talent of our artisans, as both the body and the finish are painstakingly created.

Salima Table Lamp
