South Beach Round Dining Table

The geometric layout of the teak planked top mirrors the aluminium base, separated in three sections, with an umbrella pass-thru in the cinerite indigenous colour of teak is light brown. With age, the patina turns to an elegant silver tone. The custom dark graphite finish in South Beach is designed to blend with either colour tone beautifully. If you choose to oil the teak, it will retain its original colour. If you prefer for it to age naturally, the silver tone offers an extremely sophisticated look.
